Rear Horizontal Suspension Module

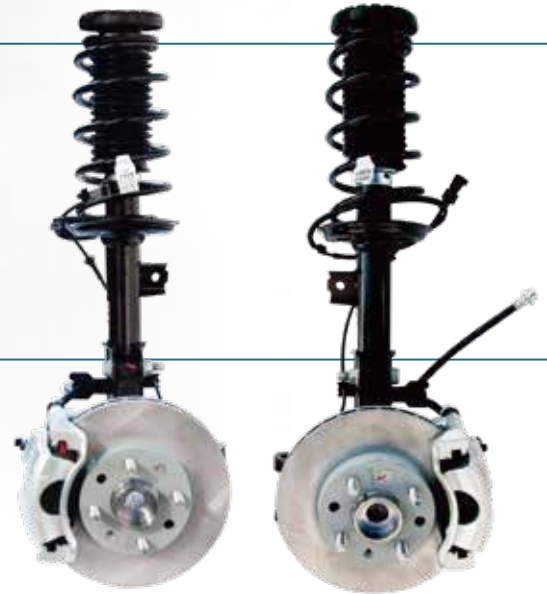

Shock Absorber

The shock absorber enhances the ride quality and driving steadiness with its characteristic absorption quality. The company produces many types of high-quality shock absorbers.

Wheel&Tire

SNT Motiv conducts focused quality control of its wheels and tires, including air pressure, balance, damage, temperature control, etc. in order to provide driving stability and customer satisfaction.

Front Vertical Suspension Module

Suspension Module

The suspension module is a key component that determines the passengers' comfort and safety. SNT provides various suspension models to completed vehicles worldwide through its technology and high-quality manufacturing system.

Knuckle

The knuckle combines the vehicle's control arm and shock absorber, enhancing the car's driving ability. We produce state of the art, light weight knuckles with the most efficient design, meticulous analysis that guarantees durability and precision.
